

MONTHLY STATISTICS OF THE FOREIGN TRADE OF INDIA

VOLUME II - IMPORTS: March 1972.

INTRODUCTORY NOTE

1. Scope of the publication

The statistics relate to imports of merchandise into all the sea-ports, air-ports and land customs stations of the country.

2. Coverage

2.1. The following items of trade are included (a) silver (other than current coins), notes and coins withdrawn from circulation or not yet issued, (b) indirect transit trade, (c) imports by parcel post, (d) dutiable articles by letter post, and (e) defence stores. (non-combatant only)

2.2. The following categories of trade are excluded (a) direct transit trade, (b) transshipment trade, (c) passengers' baggage and (d) diplomatic goods.

3. Source of data

The statistics are based on declarations made by importers as subsequently checked by Customs officials.

4. System of recording

The 'general system' is followed, according to which imports relate to foreign merchandise whether intended for home consumption, bonding or re-exportation.

5. Classification of commodities

Trade statistics are presented according to the Revised Indian Trade Classification (R. I. T. C.) introduced with effect from April 1965, except in the case of "prescribed substances" under the Atomic Energy Act, 1962. Petroleum and Petroleum Products also do not conform to R. I. T. C. from this issue onwards. The figures are shown in terms of a few specified commodities without countrywise shares. Certain changes made in the R. I. T. C. from April, 1970 are shown overleaf.

6. Country classification

Imports are credited to the country of consignment.

7. Changes in names of Countries

The nomenclature of Pakistan East has been changed to Bangladesh and that of Pakistan West to Pakistan from February 1972 issue onwards

8. Quantity

Quantity figures provided in Table 3 are net of packing.

9. Valuation

Values conform to c. i. f.

10. Totals

10.1. Table 1 shows the 'Group', 'Division' and 'Section' totals and Table 2 Country and economic region totals for the current period as well as for the corresponding period of the previous year. The Hindi equivalents of the Group Division Section and Country descriptions have been included from April 1971 issue.

10.2. Table 3 shows the quantity and value totals of each commodity for individual Countries. Item totals are marked with asterisks. Quantity totals for items, where meaningful, are also shown. Group totals relate to value only.

11. Items under reference

Value of Articles under reference' relates to items referred back to the Customs for verification. They are 'not included under appropriate headings.

12. Imports of Foodgrains and Petroleum and Petroleum Products.

Because of special systems of clearance of Foodgrains and P. O. L. items there is some delay in the receipt of full Particulars of their imports in the Department and so the relevant data are deficient to some extent. The position has since been rectified by revising the data in the light of advices from the Food corporation of India in the case of Foodgrains and from the Ministry of Petroleum and Chemicals in the case of P.O.L. items

13. Chart

Monthly average of imports of foreign merchandise during each of the last three years as well as the monthly totals for 1968-69 and onwards are presented in the chart.

14. Corrections

Amendments in respect of transactions notified during January 1972 to February 1972 received upto 28th April 1972 have been included.

15. General

Full details of the scope, coverage and concepts of these statistics may be had from this Department publication 'A Guide to Official Statistics of Trade, Shipping and Customs Revenue of India' (Revised).

16. Comparability of the statistics

The figures given in this publication differ from the exchange control data compiled by the Reserve Bank of India owing to differences in timing, coverage and valuation.
